And more...

Synology Rack Station RS409+ offers PC server equivalent performance for efficient data sharing and backup. Its high performance coupled with sophisticated Synology Disk Station Manager 2.1 provides an ideal solution for cross platform sharing, secure server backup, Windows ADS integration, business mail server, and corporate surveillance. The plug-n-use Synology RX4 easily expands the RS409+'s storage capacity up to 8 hard drives on the fly.

Corporate IT Management

Synology Rack Station RS409+ supports various volume types, like basic, RAID 0/1/5/6, and RAID 5+Spare to fit users' needs. Advanced operations allow RAID expansion and RAID type changing to provide flexible management experience.

S.M.A.R.T. is a monitoring system for hard drives used to detect and report various attributes of reliability, helping to anticipate malfunctions.

The Link Aggregation feature provides share-loading and failover support for Synology Rack Station RS409+.

Affordable Scalability

When running out of the hard drive capacity on Synology Rack Station RS409+, users can expand more storage with Synology RX4. By attaching it to Synology Rack Station RS409+, the plug-n-use connectivity and eSATA 3.0 Gb/sec definition allow users to expand volume from Synology Rack Station RS409+. No firmware installation is needed.

Perfect Backup Solution

Synology Network Backup allows users to back up files from one to another Synology Disk Station or any rsync-compatible server. The Local Backup allows backups to external hard drives via USB or eSATA, both providing flexible scheduling options.

The Local Backup provides Synology Rack Station RS409+ with the ability to back up data to a shared folder or to external USB or SATA hard drives.

Synology RX4 delivers a perfect backup solution for Synology Rack Station RS409+, too. By attaching it to Synology Rack Station RS409+, the plug-n-use connectivity and eSATA 3.0 Gb/sec definition allows users to create an independent volume on the RX4 as a good backup target. No firmware installation is needed.

Eco-Friendly

Synology Disk Station is designed and developed perpetually with the concept of energy saving. Compared with its average PC counterparts, Synology Rack Station RS409+ consumes a relatively low amount of power and hibernates when not in use. This not only helps to save energy but also extends the lifespan of the hard disk.

Additionally, all Synology products are produced with RoHS compliant parts and packed with recyclable packing materials. Synology recognizes its responsibility as a global citizen and is continually working to reduce the environmental impact of the products we create.
